**Report for Exercise 8**
Prosper Zengo, 78228 56DPH

Repository Rename Summary

- The repository was renamed via the GitHub web interface under the Settings tab.

- GitHub automatically set up redirects from the old repository URL to the new one.

- To keep the local repository in sync, the remote URL was updated using:

- git remote set-url origin https://github.com/YourUsername/NewRepoName.git

- This ensures seamless pushing and pulling from the renamed repository without errors.

- Always inform collaborators of the new repository name to avoid confusion.
